

Mjd Thif

### Self-taught web developer.

Highly focused Intermediate Level JS Developer with 5 years in the industry. Proficient with React and all its dependencies. I have been using [React](#), [Angular](#) and [Next.JS](#) along with [Restful Node](#) API and other related packages to create data visualization tools and integrated designs. I have more than 10 years of experience in the IT industry, with high technical generalist competence in. I have a strong desire to always learn more about the customer's operations and development in new upcoming technologies. Seeking to join your team to leverage a sweet experience with JS and all its related technologies on both Front and Back End development.

To obtain a position as a Web Developer where I believe I can expand my knowledge and gain new skills and experiences.

### Online Courses.

#### REACT & REDUX.

I have mastered the necessary skills to develop with React. I went on a project-based learning journey and I built declarative user interfaces (UI components) for web applications. I made the state more predictable in component's applications with [Redux](#), and make their apps more efficient and robust using newer React features and the Jest testing library. I also had the opportunity to develop mobile apps for iOS and Android devices using [React Native](#).

#### Front-End Development Track Nono-degree at Udacity

During the course I got pretty much acquainted with how the web and the Internet works. We also learned about the DOM and how JS can preform DOM manipulation.

#### Data Analysis Track at Udacity.

I was lucky to get a free Nano-Degree in Data Analysis Program at Udacity. In this courses, we went through Descriptive Statistics and learned SQL to preform data analysis.

#### NEXT JS.

I have just finished my crash course on NEXT JS, an easy JS frameworks to build UI components. In this course, I have learned new skills on top of my knowledge with React Library.

#### Python programming at Udacity.

In this this course, I familiarized myself with the building blocks of Python. I learned data types and operators, build-in functions, type conversion, whitespace and style guidelines.

#### Java-Script & DOM.

Developed the key concepts and implemented on top of it a very solid knowledge. Participated in a plenty of real-world projects.

#### Node.js

In this course, I have gained the needed skills to talk to server(MongoDb) as well as fetching and posting data from an API. Simply put Node.js is in my toolkit along with its most popular framework Express.

#### ECMAScript 6.

ES6 has brought about a ton of changes to the JavaScript programming language. In this tutorial, I explored those changes and learned about the latest features and improvements to the language including new keywords, arrow functions, the Class syntax, Promises, and so much more.

#### Git&Git-hub VCS.

Gained the competence to work collaboratively within a team, obtained the ability to push and pull files into a remote repository on git-hub. Created branches and forked other. In a nutshell Git and Git-hub is in my belt tool.

#### Web-Design in HTML5 & CSS3.

Learned Responsive Websites, Sass, Cross-Device compatibility.

#### Typography & Color.

Acquired the knowledge of how to make any text look professionally designed. Using the power of color, and creating a perfect layout were also big parts of the course's essentials.
